

# [PDF] Computer Vision: Models, Learning, And Inference

**Dr Simon J. D. Prince - pdf download free book**

---

**Books Details:**

Title: Computer Vision: Models, Learning, and Inference  
Author: Dr Simon J. D. Prince  
Released:  
Language:  
Pages: 598  
ISBN: 1107011795  
ISBN13: 9781107011793  
ASIN: 1107011795

**Description:**

This modern treatment of computer vision focuses on learning and inference in probabilistic models as a unifying theme. It shows how to use training data to learn the relationships between the observed image data and the aspects of the world that we wish to estimate, such as the 3D structure or the object class, and how to exploit these relationships to make new inferences about the world from new image data. With minimal prerequisites, the book starts from the basics of probability and model fitting and works up to real examples that the reader can implement and modify to build

useful vision systems. Primarily meant for advanced undergraduate and graduate students, the detailed methodological presentation will also be useful for practitioners of computer vision. - Covers cutting-edge techniques, including graph cuts, machine learning, and multiple view geometry. - A unified approach shows the common basis for solutions of important computer vision problems, such as camera calibration, face recognition, and object tracking. - More than 70 algorithms are described in sufficient detail to implement. - More than 350 full-color illustrations amplify the text. - The treatment is self-contained, including all of the background mathematics. - Additional resources at [www.computervisionmodels.com](http://www.computervisionmodels.com).
