Description:

When war broke out in August 1914 France had only two dreadnoughts in service, with a second pair running trials. The main body of the elite *Armée Navale* was made up of the eleven battleships of the *Patrie* and *Danton* classes, both of which were intermediate designs with two main gun calibers. Older ships included survivors of the notorious *Flotte d'échantillons* ('fleet of samples') of the 1890 program and their successors designed during the 1890s.

This book traces the development of French battleships from 1890 to 1922, and also covers the extensive modifications made to the survivors during the interwar period. It

is liberally illustrated throughout with line drawings and labelled schematics, plus photographs from the extensive Caresse collection, many of which are previously unpublished.

This is the most comprehensive account of these ships published in English or French, and is destined be the standard reference for many years to come.
